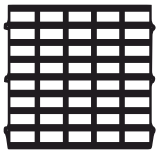
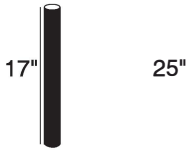
Large 4-Sided, 3-Tier Floor Display
Assembly Instructions

Your Display Should Contain the Following Components*:

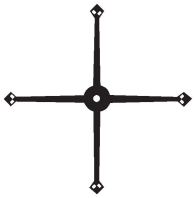


12 pcs.
13" x14" Grids

1pc.
18" Floor Base

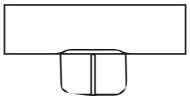


1pc. 23" Pole
2pcs. 25" Pole (with crimped End)



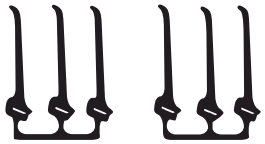
6 pcs. X-Braces

3 pcs. Pole Clamps w/ Thumbscrews



1pc.
3" Header Card Holder

16 pcs.
Tier Connectors



A Number of Peg Hooks
(Actual number will vary)

***Please note that in order to best accomodate your products, the actual components you receive may vary somewhat from those listed above.**

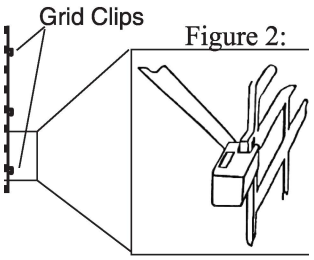
1. Assemble 4-Sided Grid Cubes

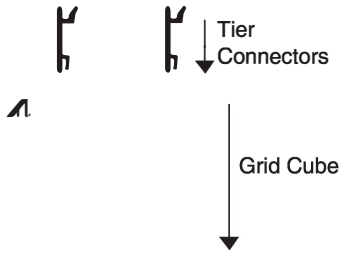
On one of the Grids, Locate the Side Hooks (see figure 1). Snap one of the X-Braces on each of the bottom Grid Hooks with the flat side of the X-Brace up and the smooth side of the Grid facing out. (see figure 2). Then snap a second X-Brace on the top clips of the same Grid.

Attach a second Grid opposite the first one using the same method. Then repeat for the two remaining sides to form a four sided cube.

With the remaining 12 Grids and 6 Crossbraces, construct three more Grid Cubes in the same manner as you made the first one.

Figure 1:





2. Assemble Display Poles

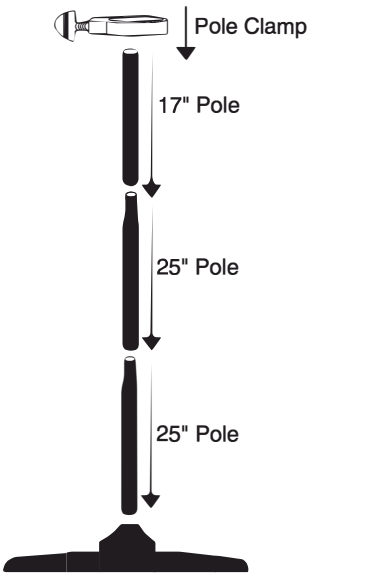
Locate the two 25" Poles with the crimped ends. Slide the crimped end of one of these poles into the larger end of the other. Next slide the 17" Pole over the remaining crimped end. You should now have a 66" tall Pole Assembly.

Place the 18" Floor Base on a flat surface. Insert the pole Assembly completely into the Base making sure that the pole assembly goes far enough in so that it will not rock back and forth.

3. Assemble Display

Slide one of the Clamps onto the Pole Assembly until it is about 12" from the bottom and tighten it onto the Pole by twisting the thumbscrew (make sure that the head of the screw is paralell with the ground when you finish tightening it).

Next, slide one of the completed Grid Cubes with the skinnier side up onto the pole and push it down until it rests on the Pole Clamp. Place 2 of the Tier Connectors on the top row of each side of the Grid Cube.



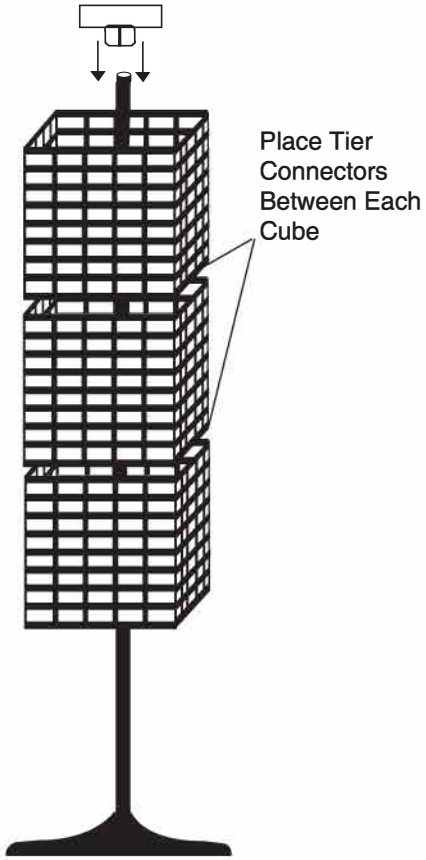
Continued On Opposite Side...

Assembly Instructions (Continued)

3. Assemble Display (Continued)

Slide a second Pole Clamp onto the Pole Assembly just above the 1st Grid Cube you just added. Tighten the Pole Clamp just enough so that it will not slide down under its own weight but will still slide down if pushed. Ease the second Grid Cube down the Pole Assembly until it rest fully in the Tier Connectors on the 1st Grid Cube. Once it is fully inserted into the Tier Connectors, raise the 2nd Grid Cube and tighten the Pole Clamp in the position is has been pushed into by the second Grid Cube so that the second Cube is resting lightly on the 2nd Clamp.

Add 2 Tier Connectors to the top row on Each side of the second Grid Cube and repeat this process for the remaining Grid Cube.



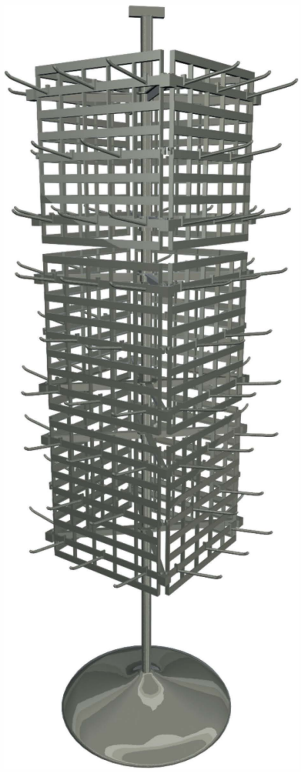
4. Adding Pegs & Header Cards

Locate the 3" Header Card Holder and place it into the top of the Pole Assembly. If a Header Card was included with your display, slide the header card into the slit in the Header Card Holder.

Remove the Pegs from the plastic piece holding them together by twisting them. Snap the Pegs into the desired positions on the display. The placement and spacing of the pegs will vary depending on the size and number of products on the display.

The finished display should look similar to the one pictured here.

If you have any questions on this display, please feel free to contact us. Please note that we only supply the display and have nothing to do with the products that came with it.



Completed Display

MADE IN THE U.S.A.
