## A Better Nylon Thread Solution:

# Beadsmith Nyline™

By Kaylee Geheb

When a staple becomes harder to find and more expensive to stock, it's time for a better solution. That's why we created Beadsmith Nyline—our reliable, consistent, and far more affordable alternative to traditional Nymo, built to deliver the same trusted performance.

For more than half a century, flat nylon thread has been a backbone of beadwork. Introduced in the mid-1950s, it became the thread of choice for beaders.

Nymo has been a standard stock in bead shops across the country. But over the past few years, Nymo's availability has shifted. Production is no longer in the United States and pricing has risen significantly. Consistent inventory has become very challenging, which creates difficulties for bead stores and their customers.

Beadsmith Nyline solves that need.

Similar to Nymo, Nyline's flat structure allows loom pieces to sit smooth and even. Its bonded nylon resists fraying under repeated passes, and because a needle can pierce the thread without weakening it, artists can secure tight corners, reinforce rows, and work detailed stitches with confidence.

Nyline maintains everything beaders value: the familiar flat profile, smooth handling, and flexibility that works beautifully in loom work and layered stitching. It passes cleanly through small-drilled beads and holds tension without cutting into them.

Nyline is available in traditional flat-thread sizes, from thinnest to thickest, as 00, 0, B, and D. This allows beaders to choose the right diameter for delicate detail work, standard stitching, or heavier designs without changing materials.

The difference is in what we control. Nyline offers consistent delivery, steady quality, and significantly better affordability, allowing retailers to stock with confidence and designers to plan without uncertainty. We're beginning with the two essential colors—black and white—with dependable inventory ready when customers need it.

Nyline brings back the reliability that flat nylon thread has always promised—strong, practical, and ready to support the techniques that define beadwork today.

## Meet Nyline

*Consistent, Affordable  
Nylon Thread  
for Beaders*

## BASIC elements®

### NYLINE™

Nyline is the newest high-quality beading thread from BeadSmith—designed for bead weaving, off-loom stitching, loom work, bead embroidery, fringe, tassels, and more. Made from a soft yet durable nylon filament, Nyline glides smoothly through beads, maintains excellent tension, and provides the flexibility needed for intricate designs. It's available in a wide range of sizes to suit every type of project and comes in both bags of 10 spools and economical boxes of 50 spools, making it ideal for individual creators, classrooms, or production environments.

Offered in the two essential, most widely used colors—black and white—Nyline ensures clean, professional results that complement any bead palette.

Whether you're crafting everyday jewelry or detailed woven designs, Nyline delivers dependable strength, consistent performance, and the ease-of-use beaders rely on.

### ELASTIC BEADING CORD

Miyuki's elastic beading cord offers a strong, flexible foundation for creating stretch jewelry pieces that are both durable and comfortable to wear. Made in Japan by one of the most trusted names in the beading world, this cord is crafted from clear polyurethane and delivers a smooth, consistent stretch. It's ideal for making stretch bracelets, anklets, and bead-strung accessories that need to maintain their shape and strength over time.

### BASICelements®

#### BEAD CHAIN

Versatile, stainless steel chain featuring durable, soldered links that keep your designs secure while still allowing for easy customization. It's ideal for stringing beads with 0.8-1.0mm holes, making it a perfect match for popular 11/0 Delicas. It's sturdy design enables you to place beads exactly where you want them along the chain. Simply use the tip of an awl, thick needle, or T-pin to gently stretch open a link at the point where you'd like your first bead to sit, slide the bead into place against the expanded link, then open a link on the opposite side of the bead to hold it snugly. Repeat the process to create unique, spaced bead patterns for bracelets, necklaces, and other chain-based designs.

Item #	Description
BMCSLO10	NEW! Stainless Steel Bead Chain - Gold Plated - 0.25 mm, 8 meter Spool
BMCSLO11	NEW! Stainless Steel Bead Chain - Silver Color - 0.25 mm, 8 meter Spool

*Works with beads as small as 11/0 Delicas*

**CZECH GLASS TABLE CUT BEAD MIXES**

Table cut beads are flat pressed glass shapes placed on a special grindstone that sands down the bead and create a window-like facet that is enhanced by coatings around the perimeter. Our collection includes floral-themed beads with other shapes. Packaged on 6 inch strands with either 3 or 6 strands per bag (see listings below). Shapes & quantity of beads per strand vary by color.

## ACRYLIC BEAD MIXES

Acrylic craft beads are a versatile and vibrant option for crafters. We're offering these beads in an impressive array of styles, including faux seashell and bone, which lend a natural, earthy touch to your creations. You'll also find gemstone-colored chips, tubes, and unique Czech-style shaped beads that add texture and visual interest to jewelry and accessories.

For those looking to incorporate a bit of shine, faux metal mixes blend metallic finishes with other accents for a contemporary twist.

With such a wide selection of shapes, colors, and finishes, acrylic craft beads are perfect for creating everything from boho-inspired designs to elegant statement pieces.

## BASIC elements®

### WIRE ORNAMENT FRAMES

*New 8-spoke design - two sizes to choose from*

Made of stainless steel, these wire forms come in a variety of sizes. The diameter of the metal spokes is 0.8mm so any bead with a hole larger than that will work with them. This is the perfect crafting project to use the stash in your beading kits: use glass beads, crystals, charms and ribbon. You can use different size beads, different shapes or shades of the same color. The decorated forms make a pretty ornament, holiday décor or Christmas present. Attach to wrapping paper, add to a wreath, or a frame. They also make a great purse charm!

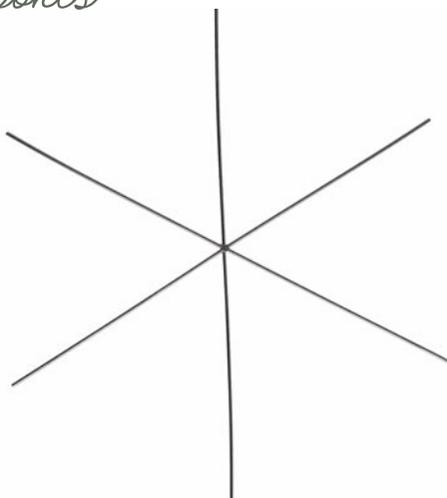

WS8-3

Item #	Description
WS3	Snowflake Ornament Wire Form - 6 Spokes - 3.75" - 0.8 mm Diameter - 8 pieces/card
WS4	Snowflake Ornament Wire Form - 6 Spokes - 4.5" - 0.8 mm Diameter - 7 pieces/card
WS6	Snowflake Ornament Wire Form - 6 Spokes - 6" - 0.8 mm Diameter - 6 pieces/card
WS8-3	<b>NEW!</b> Ornament Frame - 8 Spokes - 3.75" 0.8 mm Diameter - 6 pieces/card
WS8-4	<b>NEW!</b> Ornament Frame - 8 Spokes - 4.5" - 0.8 mm Diameter - 6 pieces/card
WS9	Snowflake Ornament Wire Form - 6 Spokes - 9" - 0.8 mm Diameter - 4 pieces/card
WSASST	Snowflake Ornament Wire Form Assortment - 6 Spoke - 6 pieces/card (2 @ 3.75", 4.5", & 6")

6 Spokes

8 Spokes

**NEW!**

Step 1

*Ornament frame how-to:*

1) Add your beads to the wire form, leaving 1/2" of empty wire at the end.

Step 2

2) Use roundnose pliers to create a loop at the wire end by turning the end of the wire towards the last bead. Repeat steps 1 and 2, until all the spokes are filled.

Step 3

3) Thread a ribbon or string through one of the end loops of your design. Hang from a Christmas tree, a purse, or anywhere you like!

## BASICelements®

### ROUND CRIMP BEADS

Crimp beads are small metal beads used in jewelry making to secure beading wire or thread in place. They are placed onto the wire or thread and then compressed with pliers. This flattens the bead and pinches it tightly against the wire to create a secure hold that prevents beads from sliding or shifting, making crimp beads essential for creating professional-looking, durable jewelry designs. Crimp beads come in various sizes and finishes, allowing for versatility in both function and style. They can be used in combination crimping pliers for a tighter closure and finished with crimp covers to create a polished and finished look.

Size Code	13	20	25	30
size	Size 0	Size 1	Size 2	Size 3

 Example: Crimp Beads Size 0 ID-0.74 mm  
 OD-1.3 mm in Black - 1 ounce  
 CBR +13 + BK = **CBR13BK**

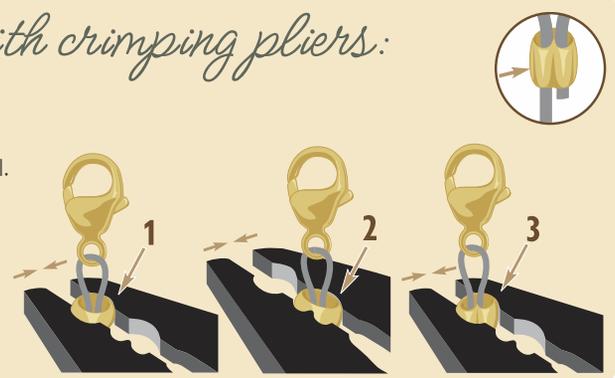

## How to use a crimp bead with crimping pliers:

At the first/last bead, jewelry wire is passed through the crimp bead, through the clasp or jump ring, then back through the crimp bead.

In **Step 1** the crimp bead is compressed in the rounding station to form it into an oval.

In **Step 2**, the crimp is fully secured to the cord by squeezing it within the crimping station. Best results are obtained when the two wires are positioned on either side of the center dimple.

In **Step 3**, the final shaping is done by turning the crimp 90°, centering it in the rounding station and squeezing it once more. The loose wire end can either be trimmed or threaded back into the bead.

New size!

### 1.5" BIG EYE BEADING NEEDLES

Big Eye needles are created by soldering the ends of 2 needles together to form an eye large enough to allow virtually any item to pass through it. Made in China.

- 4-pack of short, compact Big Eye Needles
- Great for delicate projects, tight beading spaces
- Easy threading, same smooth design you love – now in a smaller size

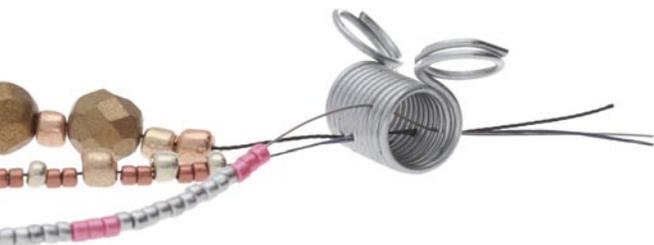

Item #	Description
LE1.5-4	NEW! 1.5" Big Eye Needles, 4 per card - 10 cards per box

### SPRING-EEZ™ COILED STRAND CLAMPS

Meet the Spring-EEZ, your go-to tool for keeping beads securely in place while you work. It clips onto your strand to prevent beads from falling off the ends, eliminating the need for messy clips or tape that can kink your thread. Made from rust-resistant stainless steel, it grips without damage and stays put, even with a tug.

Available in two sizes and a handy assortment pack, Spring-EEZ makes beading neat, easy, and frustration-free.

@theBeadSmith  
Our newest platform

We believe creativity is contagious—and social media is where the inspiration really takes off. Our presence across **Instagram**, **Facebook**, **TikTok**, **YouTube**, and **LinkedIn** is designed to spark fresh ideas, spotlight new products, and keep the jewelry-making community excited about what's next. For our wholesale and retail partners, that means more than likes and views—it means more product discovery, more engagement, and more reasons for customers to return to your store, ready to create.

Our social channels are packed with eye-catching designs, trend-driven inspiration, and helpful how-to content that makes it easier for makers to start new projects (and shop for the tools and materials they need to finish them). We highlight key product lines, seasonal favorites, and must-have tools, while also sharing technique-focused content that builds confidence—especially for beginners and hobbyists who are still learning. The result is a steady stream of creativity that keeps The Beadsmith top-of-mind and helps drive demand for the products your customers are already looking for.

We also love making it easy for retailers to join in. Our content is perfect for reposting, supporting promotions, and keeping your own feeds active with high-quality inspiration. When you share Beadsmith content, you're not only showing great designs—you're connecting customers to a trusted brand, a thriving maker community, and a reason to start their next project today.

While our consumer platforms are all about creative fun, our LinkedIn page offers a behind-the-brand look at The Beadsmith—highlighting company updates, industry news, partnerships, and milestones. It's a great space for professional connection and collaboration while staying in the loop on what we're building together.

We invite our retail and wholesale partners to follow along, engage, and share in the creative energy. When we work together across social, we're doing more than promoting products—we're inspiring customers to create, explore, and stock up for what's next.

# Meet Kaylee

Kaylee is the *Marketing and Social Media Manager* at The BeadSmith, where she brings the brand to life across all of our social media accounts. As the face behind the camera, she creates fun, hands-on, and educational content highlighting tools, products, and artists, while keeping the community engaged through creative giveaways. She's representing The BeadSmith at the Tucson trade show for this first time this year, and when she's not planning content or campaigns, she's discovered a not-so-hidden talent for metal wire jewelry—adding a true maker's touch to everything she does.
